

How to Stake Tokens to Earn CHESS

1. Go to the Tranchess at <https://tranchess.com/>
2. Connect your wallet to the platform.
 1. Tranchess now supports Metamask, Wallet Connect and Binance Chain Wallet.
 2. In our guides, we will use Metamask as an example.
3. Start staking by
 1. Navigating to the fourth tab on the front page and click "Mine with tokens"
 2. Or choose "Staking" from the top

4. The staking page contains these information:

- Total number of tokens you have already staked and their estimated BTC value.
- Total number of tokens you've staked for each of the three tranches, and their estimated value in USD.
- Wallet Balance, the number of token available for staking.
- Staking page will also inform you of any claimable transactions, just to make sure your CHESS earning journey starts ASAP!
